WhereScape®
Data Automation

Data Innovation Made Simple

WhereScape's Power at Your Fingertips

"The old system we had in place could take up to eight hours to process. It now takes 1.5 hours since our new process and architecture developed with WhereScape was put in place."

David Rutherford, Head of Application and
Data Architecture, Smith & Williamson

WhereScape RED

Unlock the Power of Automation with WhereScape RED

WhereScape RED is your all-in-one solution for data warehousing and data automation. Say goodbye to the complexities of manual coding and embrace the efficiency of automated data infrastructure. With WhereScape RED, you can design, develop, and deploy data warehouses faster than ever before. Streamline your data processes, increase productivity, and get valuable insights at the speed of business. Elevate your data game with WhereScape RED.

BENEFITS

▶ **Automation**
Automate the entire data warehousing process from design to deployment, saving time and reducing errors.

▶ **Rapid Deployment**
Build data warehouses faster, ensuring your business gets insights quickly.

▶ **Scalability**
Easily scale your data infrastructure as your business grows.

▶ **Collaboration**
Foster collaboration among data teams with a unified platform.

▶ **Reduced Costs**
Reduce ownership costs through automation and efficiency.

▶ **Data Quality**
Ensure data accuracy and consistency across your organization.

▶ **Agility**
Adapt to changing business needs with ease.

WhereScape 3D

Visualize, Plan, and Optimize Data with WhereScape 3D

WhereScape 3D is your strategic partner in building a robust data infrastructure. This powerful data modeling and planning tool allows you to visualize your data ecosystem, making it easier to align your data strategy with your business goals. With WhereScape 3D, you can identify opportunities for optimization, reduce risks, and ensure your data projects stay on track. Take control of your data landscape with WhereScape 3D.

BENEFITS

▶ **Automation**
Automate the entire data warehousing process from design to deployment, saving time and reducing errors.

▶ **Visual Modeling**
Visually represent your data ecosystem for better planning and decision-making.

▶ **Alignment**
Align data strategy with business objectives for optimized outcomes.

▶ **Risk Mitigation**
Identify potential issues and mitigate risks before they impact your projects.

▶ **Efficiency**
Streamline data project planning, saving time and resources.

▶ **Data Governance**
Maintain control and governance over your data environment.

▶ **Data Landscape Understanding**
Enhance data landscape understanding.

WhereScape Vault

Simplify Data Vault Modeling with WhereScape Data Vault Express

WhereScape Data Vault Express is your shortcut to implementing Data Vault modeling. Say goodbye to the complexities of traditional Data Vault design and hello to rapid implementation. With WhereScape Data Vault Express, you can accelerate your data warehousing projects while maintaining the integrity and flexibility of your data. Achieve faster time-to-insight and empower your data professionals with a streamlined approach to Data Vault modeling.

BENEFITS

▶ **Accelerated Modeling**
Rapidly implement Data Vault modeling for quicker time-to-insight.

▶ **Simplified Design**
Simplify the complexities of Data Vault modeling with a user-friendly approach.

▶ **Data Integrity**
Ensure data integrity and consistency in your Data Vault.

▶ **Flexibility**
Adapt to changing data requirements and business needs seamlessly.

▶ **Reduced Development Time**
Save time and resources in your Data Vault projects.

▶ **Improved Collaboration**
Foster collaboration among data professionals with a standardized approach.

▶ **Scalability**
Scale your Data Vault as your data volume grows.
