Solutions & Services

WhereScape RED
Unlock the Power of Automation

- WhereScape RED is your all-in-one solution for data warehousing and data automation. Say goodbye to the complexities of manual coding and embrace the efficiency of automated data infrastructure.

- Design, develop, and deploy data warehouses faster than ever before. Streamline your data processes, increase productivity, and get valuable insights at the speed of business among data teams with a unified platform.

WhereScape 3D
Visualise, Plan, and Optimise Your Data

- This powerful data modeling and planning tool allows you to visualise your data ecosystem, making it easier to align your data strategy with your business goals.

- With WhereScape 3D, you can identify opportunities for optimisation, reduce risks, and ensure your data projects stay on track.

WhereScape Data Vault Express
Simplify Data Vault Modelling

- Say goodbye to the complexities of traditional Data Vault design and hello to rapid implementation.

- With WhereScape Data Vault Express, you can accelerate your data warehousing projects while maintaining the integrity and flexibility of your data. Achieve faster time-to-insight and empower your data professionals with a streamlined approach to Data Vault Modelling.

CI/CD Package
Revolutionise Your Deployment Process

- The CI/CD Package streamlines software release processes by automating deployments and eliminating manual intervention, enabling faster results.

- It facilitates automated build and deployment workflows, ensuring seamless integration and delivery.

- This package supports all major coding languages and has an average implementation time of four weeks.

Consultancy Services
Tailored Consultancy Packages for your Specific Needs

- Data Engineering
- Data Science & Advanced Analytics
- Data Visualisation
- Data Governance & Strategy

Projects
Enhance Your Business Performance with Optimised Data Processes

- Data Warehousing
- Data Pipelines
- AI/ML Solutions
- Self-Service Data
- Resource Allocation

> " *Compared to other software we were looking at, WhereScape was loading data 5 or 6 times faster.* "
>
> **Will Mealing,** Head of Data & Analytics, Legacy & General

> " *We really benefitted from Engaging Data technical expertise; it was great having someone who can communicate with the business teams and translate that into technical assets.* "
>
> **COO, Investment Company**

> " *The old system we had in place could take up to eight hours to process. It now takes 1.5 hours since our new process and architecture developed with WhereScape was put in place.* "
>
> **David Rutherford,** Head of Application and Data Architecture, Smith & Williamson
